WELCOME!

We're pleased that you have chosen Salina Women's Clinic for your prenatal care. We would like to introduce our staff, if you have any questions during your pregnancy you will know whom to ask.

Dr. Merle J. "Boo" Hodges, Dr. Christopher Graber, Dr. Natalie Davis, Dr. Emily Budden, and Shanda Schroeder, APRN

Nurses: Beth, Kim, Michelle, Stormie, Trinity, & Tiffany

Receptionists: KyAnn and Shelley

CMAs: Karla, Taylor, & Courtney

CNAs: Amaya & Sam

Ultrasound Techs: Kayla, Anna, Lisa, Taylor, & Jess

Financial Counselor: Karen

Our doctors recommend that you have sonograms at 18-20 weeks and 28-30 weeks. Please be aware that some insurance companies may not pay for more than one (1) sonogram or routine screening, so you may want to check with your insurance. Sonograms can be anywhere between \$255.00 and \$300.00 each. Lab work will be done at your first appointment and as needed throughout your pregnancy. You will also receive a glucose tolerance test (and more labs) at your 28-30 week appointment.

Our charges for prenatal care, delivery, and postpartum care are as follows:

Normal vaginal delivery with prenatal and postpartum care:	\$3626.00
Caesarean section delivery with prenatal and postpartum care:	\$3737.00

These fees do **not** include the cost of the sonograms or lab tests - those will be billed to your insurance at the time the service is rendered. Your delivery fee with care (all doctor visits) will be billed to your insurance upon delivery. Please be aware that you may have to reach two (2) deductibles through the course of your pregnancy. **You will be asked to sign a financial contract explaining what we expect for monthly payments.** If your insurance changes at any time throughout your pregnancy, it is your responsibility to notify Karen, Financial Counselor, at 785-452-6228.

We are enclosing some helpful information for your prenatal experience. If there is anything we can do to help make this a wonderful experience, please don't hesitate to let us know. We are here for you!
